

When it comes to micromachining – think swisstec

Think small.

Micro.Day

- Event:** Micro.Day – a day-long affair featuring equipment demonstrations, expert discussions and case study presentations.
- Motto:** Think small.
- Where:** Plymouth/Minneapolis: Productivity, Inc.
Sunnyvale/San Francisco: TBD
- When:** Starting September 2008
- Why:** To inform/update manufacturing professionals about news and benefits of Laser based micro machining technology and give access to products, experts.
- Who:** For manufacturing and product development engineers of OEMs, contract manufacturers.
- By:** Laser MM equipment manufacturers/representatives, (Swiss Tec and Swiss Tec technology partners and representatives) and expert guest speakers (e.g. journalists of trade publications, Swiss Tec technology partners).
- Subjects:** Practical demonstration of system capabilities; review of present state of laser technology as it applies to MM; new technological developments; which new lasers are feasible for industrial applications; equipment – purchase or do-it-yourself; case studies; development of laser micromachining standards and parameters.
- Registration:** Swiss Tec LLC
